

**Subject: Continuance of the 'CISCE Virtual Learning Series' on the Council YouTube Channel in the month of October, 2020.**

Dear Parents,

This is further to the mail dated September 15, 2020 regarding the conduct of 'Live Lessons' through the CISCE You Tube Channel.

The responses received by the Council through the Online Google Forms from students, teachers and parents have been overwhelmingly positive and most encouraging. Therefore, CISCE will continue with its 'Virtual Learning Series', in the interest of the students, for the month of October as well. The schedule for the month of October will be uploaded on the CISCE website and on the CAREERS Portal.

The additional benefits of the 'CISCE Virtual Learning Series', are as follows:

- 1. Set of Question & Answers for every lesson** – At the end of each lesson, the subject expert answers questions posed by students during the live QA Session. As it is not possible to respond to all the questions posed by students during the live sessions, the answers to the remaining questions received during the live sessions are made available in the form of a set of written questions & answers. These questions and answers for each live lesson are available on the CISCE website, in the Notice Board Section.
- 2. Assignments for every Lesson** – Immediately after the Q/A Session, the Subject Expert provides an assignment for students to do. These assignments are given at the end of every live streamed lesson. This is good as a practice exercise for the students.
- 3. Availability of the lesson videos after they are live streamed** – Post the live streaming of each lesson, the videos are made available on the CISCE website so that students and teachers, who may have missed the live lesson, can view the videos later.

You are requested to avail the benefits of the CISCE's initiatives.
