

Dear Parents,

Hope things are going well with you and in spite of all the adversities around, with all your positive strength you are coming out triumphant. We wish you all the best in all your endeavours.

As you are aware we are going ahead with our online teaching- learning transactions. Initially, we started lightly with our live sessions, but gradually we are adding momentum and will deliver in full pace, keeping with the requirements of the curriculum and mapping it with the annual academic activity calendar. The process of evaluation has also been integrated with this.

We are happy to share that these online interactions have brought about a greater bonding between the student and the teacher and children are finding it comfortable to share their issues and clarify their doubts on a one to one basis. Children who are usually quiet & feel shy to open up in front of others are also finding it easier to communicate in this way with the teacher. The interactions are more focussed and intense and are giving a better platform to discuss common errors and ways to address them. It has also brought in pre - reading on the part of the student as a requisite to meaningful discussions. So, this has added a special dimension to our methods of teaching - learning.

As per the two government announcements, the city moves to another phase of lockdown till April 30, 2020 and children will come back to school after June 10, 2020. In between there is a period of little more than a month, when you may have to leave for your work place and your children will be back at home. In this regard, we would like to point out that our online methods of delivery will continue throughout this period and hence would request you to make provisions for the required devices and connectivity for your child so that the process of study transaction is smooth and the child can get maximum benefits of the inputs given.

We would like to reiterate that our commitment towards our children stands firm. We will continue to explore better learning platforms and more effective ways of communicating and adopt those to meet the requirements, so that we can reach out to our children more constructively.

We do stand together to fight this menace and come out victorious in our efforts to make things better for our children

Seeking your kind cooperation.
